

# Doses of vaccines for Australian children from birth to adolescence

**1960**

**2016**

**TOTAL DOSES: 5**

**TOTAL DOSES: 19**

**TOTAL DOSES: 32**

**TOTAL DOSES: 52 (22 injections)**

Smallpox	Polio	Diphtheria-Tetanus-Pertussis (3 months)	Diphtheria-Tetanus-Pertussis (2 months)	Diphtheria-Tetanus-Pertussis (pregnancy)
Diphtheria-Tetanus-Pertussis	Diphtheria-Tetanus-Pertussis (4 months)	Polio (2 months)	Hib (2 months)	Influenza (pregnancy)
Diphtheria-Tetanus-Pertussis (5 months)	Diphtheria-Tetanus-Pertussis (4 months)	Diphtheria-Tetanus-Pertussis (4 months)	Diphtheria-Tetanus-Pertussis-Hepatitis B-Polio-Hib (2 months)	Hepatitis B (Birth)
Polio (6 months)	Polio (4 months)	Polio (4 months)	Pneumococcal (2 months)	
Polio (8 months)	Hib (4 months)	Hib (4 months)	Rotavirus (2 months)	
Polio (10 months)	Diphtheria-Tetanus-Pertussis (6 months)	Diphtheria-Tetanus-Pertussis (6 months)	Diphtheria-Tetanus-Pertussis-Hepatitis B-Polio-Hib (4 months)	
Measles (12 months)	Polio (6 months)	Polio (6 months)	Pneumococcal (4 months)	
Diphtheria-Tetanus-Pertussis (15 - 18 months)	Hib (6 months)	Hib (6 months)	Rotavirus (4 months)	
Diphtheria-Tetanus (5 - 6 years)	Measles-Mumps-Rubella (12 months)	Diphtheria-Tetanus-Pertussis-Hepatitis B-Polio-Hib (6 months)		
Rubella (12 - 14 years, ♀ only)	Diphtheria-Tetanus-Pertussis (18 months)	Pneumococcal (6 months)		
	Hib (18 months)	Rotavirus (6 months)		
	Diphtheria-Tetanus-Pertussis (4 - 5 years)	Measles-Mumps-Rubella (12 months)		
	Polio (4 - 5 years)	Hib-Meningococcal C (12 months)		
	Measles-Mumps-Rubella (10 - 16 years)	Diphtheria-Tetanus-Pertussis (18 months)		
	Hepatitis B (3 doses, 10 - 16 years)*	Measles-Mumps-Rubella-Varicella (18 months)		
*Commenced in VIC & TAS	Diphtheria-Tetanus-Pertussis-Polio (4 years)	Diphtheria-Tetanus-Pertussis-Polio (4 years)		
	Human papillomavirus (HPV) (3 doses, 12 - 13 years)			
	Diphtheria-Tetanus-Pertussis (12 - 13 years)			
	Varicella (12 - 13 years)			

Seasonal influenza vaccine recommended for children aged 6 months to 5 years. Two doses in the first year. (5 additional doses not included above).

## **"Infectious deaths fell before widespread vaccination was implemented"**

- Australian of the Year (2003), Prof. Fiona Stanley, *Child Health Since Federation*, 2001.

**Improved nutrition, sanitation and hygiene** are understood to be the major factors that resulted in reduced mortality from infectious diseases

### **Did you know?**

Although the Australian government adheres to the rhetoric that "Vaccines are safe and effective", within the USA vaccines are legally classified as 'unavoidably unsafe'.

The National Childhood Vaccine Injury Act (NCVIA) of 1986 grants drug companies' immunity from lawsuits resulting from injuries or deaths associated with vaccinations. Although this is a US law it provides global protection provided the vaccine is first licensed in the USA.

The NCVIA also established the **National Vaccine Injury Compensation Program (VICP)** which has since paid out over \$3.5 billion to vaccine injured individuals (vaccine court). The funds to support this program are derived from what is essentially a tax on vaccines, paid for by those receiving the vaccinations. There is

no similar program in Australia enabling compensation for affected individuals.

Rather than using inert placebos such as saline solution, vaccine **safety studies** typically compare the new vaccine against an existing vaccine, or against compounds commonly used in vaccines such as the heavy metal aluminium.

Vaccines contain a wide array of ingredients other than the disease antigen components derived from the bacteria and viruses that the vaccines are targeting. Some of these additional ingredients include:

- Heavy metals such as **aluminum** and **mercury** (thimerosal)
- Preservatives like **formaldehyde** and **phenoxyethanol**
- **Antibiotics** including neomycin and streptomycin

- Human cell cultures including **aborted foetal (diploid) cells**
- Animal proteins from cows, chickens, dogs, monkeys and pigs
- Other compounds such as **polysorbate 80, sodium borate, MSG, gelatine and acetone**.

## **So what can I do about all this?**

Report adverse reactions to **ALL** pharmaceuticals to the TGA-  
<https://www.tga.gov.au/reporting-medicine-and-vaccine-adverse-events-0>

**Report adverse reactions** to vaccines to your doctor  
**Communicate your thoughts and concerns to politicians** – phone, write, or in person!

Join the **Vaccination Decisions** email list  
**Donate** to the Vaccination Decisions website  
**Join the AVN**  
Share what you know and **bring friends to community information nights**

Register your interest to **help with events**  
**RESEARCH, QUESTION EVERYTHING, AND BE BRAVE!**
