

APPENDIX 3: COMPONENTS OF VACCINES USED IN THE NATIONAL IMMUNISATION PROGRAM

Please note that vaccine manufacture is subject to ongoing refinement and change. Therefore, the information in Table A3.1 may change. This information was current as of early 2017 and has been sourced from the product information (PI) of each vaccine listed. The Therapeutic Goods Administration provides the most current versions of the PI and Consumer Medicines Information (CMI) documents for vaccines (and other medicines) on its website at www.tga.gov.au.

For vaccines *not* listed in the National Immunisation Program (NIP), please refer to individual product information leaflet as supplied with the vaccine, or the *Handbook* chapter pertinent to that vaccine.

None of the vaccines listed on the NIP contains thiomersal.

* If the person to be vaccinated has had an anaphylactic reaction to any of the vaccine components, administration of that vaccine may be contraindicated. Specialist advice should be sought to identify the component and to review if the person can be vaccinated in future.

† Please also refer to Appendix 4 *Commonly asked questions about vaccination* for more specific information about these various constituents.
