

Evidence Required by WA Politicians to Demonstrate the Necessity to Implement *No Jab No Play* Policies

The concerned WA community would like WA politicians to provide evidence for the following five questions about the benefits of vaccines. This evidence must be provided to the community to prove that the ***No Jab No Play*** policy is necessary and is a protective health policy for the majority of the WA community:

1. Evidence of the number of **vaccinated** and **unvaccinated** children in WA per year who are getting the 16 infectious diseases that have been mandated in the ***No Jab No Play*** policies. This includes the vaccination status of children who have died of these 16 diseases in the last two decades in WA.
2. Evidence of when each of the 16 vaccines has ever been used with a 95% uptake ***in any community*** to demonstrate that they can create herd immunity to protect the population.
3. Evidence that the overall health of WA children has improved with the increased use of vaccines **since 1990**. This includes both chronic illnesses and those due to infectious diseases.
4. Evidence that WA politicians and doctors are informed of the **ingredients of the 16 vaccines** and the **serious side-effects** that the pharmaceutical companies **have associated** with these vaccines for 6 decades, and that politicians and doctors are providing this information to the community/patients **in a transparent manner**.
5. Evidence of the percentage of WA children who will die or be harmed by this policy due to the chemicals in the vaccines and the hidden health effects resulting from their genetic make-up.

Politicians who implement this medical intervention without providing objective evidence for the questions raised above will be held liable for any harm that is caused to individuals on whom these policies are enforced.

The current directive for fully informed consent to vaccination as stated in the *Australian Immunisation Handbook (Ed 10)* is being breached by WA politicians if they implement ***No Jab No Play*** policies without providing the public with the evidence above.

Premier **Mark McGowan**, Minister **Roger Cook**, Minister **Sue Ellery** and Minister **Simone McGurk** are endorsing the safety of combining sixteen vaccines in an infant's body in this legislation and the community will hold them liable for any harm that is caused by this legislation if they have not provided the evidence that has been requested in this document.
