

WA Premier Mark McGowan
5 March 2019

To the Honourable Mark McGowan

RE: No Jab No Play Policies in WA

Further to my letter of the 21 February 2019 I would like to bring your attention to the letter that I sent to Health Minister Roger Cook and Minister Sue Ellery (25 January 2019) for which I have not yet received a response. This is a matter of the government's liability for legislating on a medical intervention.

The questions that I have asked the Ministers are critical to a government policy that will discriminate in the use of social and educational services in WA based on a medical intervention. This policy may be considered a crime against the population because it is discrimination based on medicating the public with 16 vaccines including many vaccines that previous generations have *never used*.

Please read the attached letter that was sent to the Ministers on the 25 January 2019 and also the attached document that contains five questions that the WA community would like answered with evidence to show that *these policies are necessary and protective of public health* in the genetically diverse WA population.

I look forward to your prompt response to these questions as I am sure that you will have sought this evidence *before* you decided that it was necessary to implement these discriminatory policies. These are policies that remove the fundamental right for people to choose how many vaccines (drugs) they use in their children's bodies and in themselves in order to use essential community services.

The question of liability for these policies needs to be established *prior* to politicians adopting these policies.

Please be advised that this is an open letter that will be provided to the WA and global community that is extremely concerned about mandatory vaccination policies.

Kind regards,
Judy Wilyman PhD
Vaccination Decisions
www.vaccinationdecisions.net

The Five Questions the WA Government needs to Answer before Implementing No jab No Play:

- 1) What are the statistics for the number of **vaccinated** and **unvaccinated** children in WA per year i) getting each of these 16 diseases and ii) dying of these 16 diseases?
- 2) Which communities have used these 16 vaccines with a **95% uptake** rate to control these diseases?
- 3) What statistics can you provide that show that the **overall health** of WA children (chronic illness and other diseases) has improved since 1990 when the vaccination program expanded?

4) i) Are WA politicians and doctors informed of the ingredients of the 16 vaccines and the serious adverse-events that the pharmaceutical companies have **associated with** vaccines for six decades? (coincidence is not an **evidence-based response**)

ii) Do WA politicians and doctors provide this information to the public and patients in a transparent manner before they recommend vaccines to the community?

5) i) What **percentage of WA children** will **die** or **be harmed by** this policy because of the known side-effects of the chemicals in the vaccine and the hidden effects that occur in individuals due to their genetic make-up?

ii) What AE's have you included in this risk assessment and **how did you arrive at this risk assessment?**

Politicians who implement this medical intervention in the NJNPlay legislation without providing objective evidence for the questions raised above will be held liable for any harm that is caused to individuals on whom these policies are enforced.

The current directive for fully informed consent to vaccination as stated in the *Australian Immunisation Handbook (Ed 10)* is being breached by WA politicians if they implement **No Jab No Play** policies without providing the public with the evidence above.

Premier **Mark McGowan**, Minister **Roger Cook**, Minister **Sue Ellery** and Minister **Simone McGurk** are endorsing the safety of combining sixteen vaccines in an infant's body in this legislation and the community will hold them liable for any harm that is caused by this legislation if they have not provided the evidence that has been requested in this document.
