

Newsletter 166 The Federal Greens state they will not protect Informed Consent to Vaccination - a Medical Intervention

30 July 2017

Did you know that Australia is the only [democracy](#) in the world that does not have a national law that protects the rights and freedoms of citizens?

The Australian federal government recently recommended that all states sign up to the **No Jab No Play** legislation that will prevent children from attending childcare and preschool centres *if* they do not have the "full" schedule of ~ 25 doses of vaccine against 16 diseases. That is, anyone who wishes to *choose* how many vaccines their child receives will be banned from childcare and preschool centres.

This is a policy that involves the [injection of chemicals](#) into the human body *that most doctors and parents are not informed about prior to consent.*

This is in addition to linking welfare payments to the "full" schedule of vaccines in the **No Jab No Pay** legislation introduced on 1 January 2016. This schedule of vaccines can change at any time.

For example, *four new vaccines were added in 2013 and now they are mandatory.* No justification provided. Vaccines have always been voluntary - even when there were epidemics of infectious diseases.

This legislation is being mandated with coercive measures without providing doctors and parents with the ingredients of vaccines or the known risks of these ingredients in genetically diverse individuals. This is a breach of the [Good Medical Practice Guidelines](#)

for doctors and it violates human rights.

In Western Australia, the concerned community has spoken with the Greens and we have been informed that they will not table the community's petition opposing the removal of "**informed consent without coercion**" in the proposed **No Jab No Play** legislation. This will obstruct the community's right to participate in the discussion on this legislation when the bill is tabled in WA.

Whose interests are the Greens protecting **in government policy** if they will not table the people's petition requesting our right to good medical practice and fundamental human rights in health policies?

To date the Liberals, Labor and Liberal Democrats in WA have refused to meet with us. I will keep you updated on this situation.

In South Australia the **No Jab No Play** bill has recently been tabled and it is open for community discussion **until the 11 August 2017**. Further information on this can be found [here](#)

As previously stated this is not about pro- or anti- vaccination. It is about the health of the community. It is the mainstream media (influenced by powerful industry funded lobby groups in Australia) that is framing this debate as "**anti-vaccination**" and until this is rectified our children's health and good medical practice in Australia will continue to decline.
