

Newsletter 173 Vaccine-Created Herd Immunity did not Control Infectious Diseases

10 September 2017

Please find below the letter I have sent to ~60 academics at the University of Wollongong:

Open Letter

University of Wollongong (UOW), Australia, Academics

Copied to UOW Vice-Chancellor, Paul Wellings

Dear Professor Heather Yeatman and Alison Jones and other UOW academics,

Here is the second instalment of the videos describing my research at the University of Wollongong that you have not addressed in your promotion of vaccines on the UOW website.

Dr. Judy Wilyman [The Right to Choose how many Vaccines we use in our Bodies. \(Transcript here\)](#).

I would like to invite you to come to the gathering in Martin Place, Sydney on Tuesday 12 September (10 am – 2 pm) to provide your evidence for the NSW **No Jab No Play** bill that will be debated in parliament on this day.

I will be there to present the case against this policy that will cause significant harm in the population if it is passed. The concerned Australian public would like you to provide the evidence that refutes the conclusions made in my in-depth PhD research on this topic.

To date UOW academics have not participated in any debate on this topic and some UOW academics have actively tried to suppress this debate. The concerned Australian public expect that a UOW academic with expertise in this field would be happy to come to Martin Place on

18/03/2021

Tuesday to justify this policy.

Sweden and now [Columbia](#) have stated that mandatory and coercive vaccination policies are unconstitutional.

There is extreme concern in the Australian population about the use of warrants to [search doctors clinics](#) who are speaking up against this policy and the banning of public forums in Australia for public debate of vaccination by academics and parents.

Kind regards,

Dr. Judy Wilyman

Bachelor of Science, University of NSW

Diploma of Education (Science), University of Wollongong

Master of Science (Population Health), Faculty of Health Sciences, University of Wollongong.

PhD in [The Science and Politics of the Australian Government's Vaccination Program](#), UOW

School of Social Science, Media and Communication (re-named the School of Humanities and Social Inquiry in 2014).
