

Newsletter 178 The Australian Government is using Pseudoscience to Remove Vaccination Choice - a Human Right.

15 October 2017

Currently the Australian government is mandating with coercive strategies (financial penalties) 16 vaccines for children up to 20 years of age. There are also many employment situations in Australia that are now mandating these vaccines. Soon all adults will be mandated to have the 16 vaccines plus boosters throughout life - and any of the 200+ new vaccines being developed that the government decides to add to this schedule.

This legislation has been implemented without any scientific debate or public discussion of the risks associated with vaccines in the Australian media. Further, the Australian media has promoted false information about the benefits of vaccines. Doctors and nurses in Australia are also being prevented from discussing the medical risks with the public through their professional regulatory boards.

Evidence for these facts are provided below:

This 18 min video of my speech about [Vaccination Choice](#) at the rally in Sydney, Martin PI (12 September 2017) to protest the introduction of the **No Jab No Play** policy describes the lack of science in this government policy. The policy was adopted in NSW on the **14 September 2017** by ignoring the public's concerns - *and without discussion with the public.*

This 1 hour interview with Sarah Westall on the US radio program Business Game Changers - [The Vaccination Debate: Let's get Serious](#) - describes the political strategies that are being used by governments to manipulate public behaviour on the use of vaccines.

This 50 min video - [Questions and Answers: No Jab No Pay/Play Policy](#) - demonstrates the lack of scientific debate by health and government authorities *before* the **No Jab No Pay** policy was introduced in Australia in January 2016. It lists all the government officials who declined to attend a public forum at the university to discuss the necessity for this policy. It also discusses the

lack of science underpinning the policy and the breach of human rights that has occurred with these policies..

Sweden and Colombia have stated that mandatory vaccination policies violate constitutional rights and they will not adopt these policies because of the [serious adverse health outcomes](#) associated with vaccines.

If vaccines to prevent 16 infectious diseases in Sweden are not thought to be beneficial to health outcomes then why is the Australian government claiming that mandatory and coercive vaccination for 16 vaccines (36+ doses), that removes human rights, is needed in Australia when the threat of these diseases is no greater - and vaccination has always been voluntary?
