

Newsletter 181 The Ingredients of Vaccines and their Effects on Children's Health

6 November 2017

Here is the link to my talk at the Perth Convention Centre (4 November 2017) that describes the risks of mandatory and coercive vaccination policies.

This video provides evidence of the breach of the medical code of conduct that doctors are now participating in and the breach of the Australian government's duty of care to the Australian public.

It also shows that these policies are not for a legitimate public health purpose and this is why they have not been introduced in any legislation or regulation in the Australian Health Department. They have been introduced in the Department of Social Services and there is no evidence that they will improve the health of the population.

In this video I provide the evidence that these social welfare policies will be detrimental to the health of the Australian population. Any politician, doctor or academic who is ignoring this evidence can be held liable for the damage they will cause to human health.

Please watch my presentation at the Perth Convention Centre (4 November 2017) '[The Ingredients of Vaccines and their Effects on Children's Health](#)' and forward to family and friends.

Judy Wilyman PhD

Bachelor of Science, University of NSW

Diploma of Education (Science), University of Wollongong

Master of Science (Population Health), Faculty of Health Sciences, University of Wollongong.

PhD in [The Science and Politics of the Australian Government's Vaccination Program](#), UOW

School of Social Science, Media and Communication (re-named the School of Humanities and Social Inquiry in 2014).
