

Newsletter 193 Medical Tyranny in Australia "Nurses must Promote Vaccines"

6 March 2018

Re [UN Expert "Astonished" at the Tunbull Government's Anti-Democratic Slide](#)

In Australia the **Medical Board of Australia (MBA)** has removed the autonomy of doctors and nurses to advise their patients on vaccination based on their experiences and knowledge of vaccines. This is being done by linking the promotion of government vaccination programs to their medical registration.

This is contrary to their own ***Good Practice Guidelines*** in medicine based on the Geneva Convention.

The MBA is restricting the education of health professionals to *selected* studies that it claims is the "accepted" body of science on this topic and threatens them with de-registration if they discuss the risks of vaccines in their practice of medicine or in public forums and on social media.

This selected "education" leaves out the history of the decline of infectious diseases in developed countries and the serious adverse health outcomes / death to vaccines. This amounts to indoctrination not 'education'.

My [university research](#) that examines the medical literature on the history of infectious diseases in Australia shows that infectious diseases ***were not controlled by vaccines***.

Here is my response to the article '[Nurses told to Promote Vaccines](#)' in the West Australian newspaper that exposes the myths (lies) that are being used to promote government vaccination policies. These articles are being provided to the public by "medical editors" that do not have any medical or health qualifications.

Freedom in the use of vaccines in Australia has already been removed for many Australians. This includes choosing a career in health (and other institutions) and eligibility for welfare benefits and early childhood education.

The MBA is currently investigating doctors, some with 40 years experience of clinical practice in using vaccines, based on allegations that "they are undermining a protective health program".

Yet the MBA and the Australian Government did not provide evidence for the *necessity* to use 16 vaccines when they linked financial benefits to this intervention **and removed** conscientious and religious exemptions at the same time.

In contrast to this, the MBA will [not investigate](#) a doctor that has promoted false and misleading information about university research on vaccines and used inappropriate methods to denigrate this research. This doctor, [John Cunningham](#), who is the leader of the industry lobby group SAVN - known for its disrespectful debate of vaccines - was awarded an **Order of Australia Medal in January 2016**.

His award was stated to be for his contribution to "Science and Immunisation" yet this doctor is not specialised in immunisation and he does not have any publications on the *control of infectious diseases, immunology or vaccination science*. His conduct in promoting vaccination included denigrating university research in the Australian media *with false information* from 2014 - 2016.

A UN expert has declared his astonishment at the Turnbull government's [anti-democratic slide](#) and this includes the loss of freedom of speech in public health policies by academics and the gagging of health professionals, by the MBA, to speak about the risks of vaccines to their patients or on social media.

Or even to provide advice on the risks of vaccines to patients *regarding their own specific genetic circumstances*. How does this qualify as good medical practice?

Dr. Judy Wilyman

Bachelor of Science, University of NSW

Diploma of Education (Science), University of Wollongong

Master of Science (Population Health), Faculty of Health Sciences, University of Wollongong.

PhD in [The Science and Politics of the Australian Government's Vaccination Program](#), UOW

School of Social Science, Media and Communication (re-named the School of Humanities and Social Inquiry in 2014).

Protecting Your Child's Health in Australia

Here are two articles that will assist parents to take action to protect their child's health:

1) **Allona Lahn** is a hero to all parents and a role model to those who truly care about their children's health. If you have not done your homework on the ingredients of vaccines and the control of infectious diseases in Australia then you are letting your children down. A government that suppresses the other side of a medical issue in the media and supports doctors/nurses in removing their autonomy to act on their experience and knowledge **is not about 'health'**. Here is what you can do to [protect your children's health](#)

2) Please ensure that you watch this 3 part video series on the **dangers of the HPV vaccine** (cervical cancer) that are being debated globally but NOT in Australia. This film has just won 2 awards in Brisbane for investigative journalism '[Sacrificial Virgins](#)'.

In a political model where conflicts of interests are dominating government policies on health it is up to parents to do their own research on vaccines and to use common sense and intelligence to protect your children's health. It is no longer good enough to blindly **trust** the medical /industry model of health and governance.

Supporting Public Interest Research

I would like to thank everyone who has supported my research and newsletters over the last 5 years. If you have appreciated this unfunded research and debate of children's health I hope you will consider a [\\$5 donation](#) for the upkeep of my website and continuation of my voluntary newsletters.

Only funded research is promoted to the public and universities do not promote student research. Hence the need for my website and newsletters to promote my independent research that is in the public interest.

My website [Vaccination Decisions](#) became necessary because the University of Wollongong [is not required to rectify the academic record when organised industry-lobby groups](#) provide false information about my university research in the mainstream media.
