

Newsletter 205 Medical Doctors and PhD Scientists Speak Out Against Vaccines

23 July 2018

The Australian government's claims of safety and efficacy of vaccines are being underpinned by non-objective science provided by the pharmaceutical companies through industry-funded institutions and lobby groups.

Here is a link to the [medical doctors and the PhD scientists](#) who are providing the evidence of the harm that vaccines are causing in the population and the fact that doctors in Australia can no longer provide patients with these risks of vaccines for fear of being investigated by the government medical professional regulator (AHPRA). The risks are being described as "**anti-vaccination material**" and health professionals can be **de-registered** for presenting this information.

This means doctors are breaching their Hippocratic oath to promote their patient's best interest first – the Declaration of Geneva that is part of the **Medical Board of Australia's (MBA)** good medical practice guidelines for doctors.

Instead doctors are being required by their regulations to promote the government's schedule of 16 (~50 doses) vaccines to patients regardless of their individual genetics and without informing patients of the ingredients or serious risks of vaccines described by the Institute of Medicine (IOM).

Here is the link to 100's of professionals warning you against vaccines - [Medical Doctor's and PhD Scientists Speak Out Against Vaccines](#). I am listed at no. 72 on this list providing evidence of the harm coercive and mandatory vaccination policies are causing in populations.

This political situation is allowing unqualified people to promote false and misleading information about vaccines in the Australian mainstream media.

Human rights and health are being lost in Australia because:

1. Politicians are being informed about vaccines by powerful industry/medical lobby groups with biased information and
2. Non-qualified individuals from these lobby groups are permitted to use the official channels to suppress academic debate in Australia and to make fabricated complaints about professionals and academics who question vaccines to tarnish their reputations.

For evidence of the powerful lobby groups and COI in Australian vaccination policies, including the influence of Rupert Murdoch, please see below:

1. Elizabeth Hart's 30 min presentation demonstrating the [COI of industry in government vaccination policies](#)
2. Elizabeth Hart's letter to [Rupert Murdoch and his influence in the No Jab No Pay /Play policies](#)
3. Judy Wilyman's [PhD completed at UOW \(2015\)](#) that demonstrates the government's vaccination policies are doing more harm than good in the Australian population
4. Judy Wilyman's 40 min presentation at the [Censorship of the Vaccination Debate in Sydney](#) (April 2018) describing why Australia's vaccination policies [are not "protective" public health policies](#) and they are destroying the genetic fabric of the population (use the 'not now' button to view without signing into fb).
5. My interview with Sarah Westall on Business Game Changers describing how [global vaccination policies are being designed using non-objective science](#)
6. My webinar with the **Australian Natural Practitioner's Association (ANPA)** titled ['Informed Consent to Vaccination: Current Issues in Australia'](#) that describes how the Nuremberg Code has been breached in the Australian No jab No Pay/Play legislation without the support of the Royal Australasian College of Physicians or the NHMRC in the Australian Immunisation Handbook (ED 10).
7. **Robert Kennedy Jr (attorney)** recently used the freedom of information (FOI) act to request that the US Department of Health and Human Services (DHHS) show that it has fulfilled its duty to the public in providing safe vaccines since 1987. Here is the document that proves that the US DHHS has failed to take any action [over the last](#)

7. [32 years to ensure that childhood vaccines are safe.](#)

This is relevant to Australia because we use vaccines that are licensed in the US and approved in Australia ***under a different name without further testing.***

I have provided this information to the official Australian health authorities who deal with consumer complaints about health issues and I will provide you with their response when I receive it.

Judy Wilyman PhD

Bachelor of Science, University of NSW

Diploma of Education (Science), University of Wollongong

Master of Science (Population Health), Faculty of Health Sciences, University of Wollongong.

PhD in [The Science and Politics of the Australian Government's Vaccination Program](#), UOW

School of Humanities and Social Inquiry.

Some of the Ingredients in Vaccines:

Did you know that antibiotics are in most vaccines?

Please consider whether you want these substances injected into the tissues of your new born infant before the blood brain barrier is developed at 6 months of age or their other body systems. These ingredients and more are present in vaccines and the vaccination schedule has expanded to 16 vaccines requiring 52 doses from birth to adolescence.

And the '***new norm***' - allergies, anaphylaxis, Chronic Fatigue Syndrome (CFS), autoimmune disorders (diabetes, childhood rheumatoid arthritis, arthritis, multiple sclerosis etc.) autism, speech delay, neurological disorders, ADHD, childhood cancers.

Supporting Public Interest Research

I would like to thank everyone who has supported my research and newsletters over the last 5-10 years. If you have appreciated this unfunded research and debate of children's health I hope you will consider a [\\$5 donation](#) for the upkeep of my website and continuation of my voluntary newsletters.

Only industry-funded research is promoted to the public and Australian universities do not promote student research or protect student's reputations in public debates of their research. Hence the need for my website and newsletters to promote my independent research that is in the public interest.

My website [Vaccination Decisions](#) became necessary because the University of Wollongong [is not required to rectify the academic record when organised industry-](#)

[lobby groups](#) provide false information about my university research in the mainstream media.
