

## Newsletter 206 Health Minister Greg Hunt's Comments on 'Sacrificial Virgins' are a Risk to Public Health

27 July 2018

The award winning documentary film exposing the dangers of the HPV vaccine titled ['Sacrificial Virgins'](#) will be touring Australia this coming week starting on the Sunshine Coast Qld on 2 August.

Joan Shenton, investigative journalist says: *"Sacrificial Virgins shows there's no evidence that vaccines used in immunisation programs to guard against HPV will also prevent future onsets of cervical cancer – because there's no scientific evidence that HPV actually causes such cancers. However, the film provides plenty of evidence that, after vaccination, countless young women worldwide have experienced life-changing neurological damage.*

This vaccine was removed from the national immunisation programs in India and Japan in 2014 with many class actions occurring around the world. Recently, in 2018 the worldwide debate of this vaccine was discussed in a [Global Statement from Vaccine Victims from Five Countries](#). But this is not discussed in the US or Australian mainstream media - this debate has been suppressed and censored in these countries as 'anti-vaccination information'.

Australia's Health Minister, Greg Hunt, has labelled the award winning film about the dangers of the HPV vaccine [as making 'dangerous and reckless' claims](#). He has made this statement without ever viewing the film and without finding out who the scientists are that he is criticising.

Our Federal Health Minister, Greg Hunt, ***is a risk to public health.***

He does not have any health or scientific qualifications yet he is dismissing the claims made by reputable scientists in this award winning investigative film without any interest in seeing the film. He simply states "I have no time for the false and reckless claims made by anti-vaxxers and I will continue to call out their dangerous claims."

The Sydney Morning Herald article also states that immigration minister, Peter Dutton, has not

ruled out banning this award winning investigative journalist from entering Australia for the tour. In a similar way to the banning of Dr. Sherri Tenpenny, Polly Tommy and Ken Heckenlively who wanted to discuss the documented risks of vaccines that parents are observing and that are described in the medical literature.

This is a scientific issue and the public should be able to hear all the evidence for the multiple vaccines that have now been mandated for our children without the requirement for secret venues and the banning of speakers entering the country.

In 2011 I wrote a letter to [Professor Fiona Stanley](#) about the lack of proven efficacy, the harmful ingredients and the extremely high number of neurological reactions that were occurring to this vaccine. She did not answer these questions and nor did the Therapeutic Goods Administration (TGA).

In 2013 scientists at the University of British Columbia picked up this letter and we had it published in the [Infectious Agents and Cancer Journal](#).

In June 2013 my article titled "HPV vaccination programs have not been proven to be cost-effective in countries with comprehensive Pap screening and surgery" was published in the *Infectious Agents and Cancer Journal*

<https://infectagentscancer.biomedcentral.com/articles/10.1186/1750-9378-8-21>

And presented at two international cancer conferences in San Francisco (2013) and London (2014).

At this time (2014) prominent leaders of the **SAVN industry/medical lobby group David Hawkes** and **Dr. John Cunningham**, who have influence with Liberal, Labor and Greens politicians (specifically Greens leader, Richard Di Natale) provided false information about the HPV vaccine to politicians.

The false information that they provided is described in **Appendix 5 of my PhD thesis - [Comment on the Hawkes et al 2013 Paper](#)**. My critique shows that they have not supported their claims of safety and efficacy of the HPV vaccine, that they provided to politicians, with evidence.

In 2015 I presented a case study of the HPV vaccine in my [PhD thesis - Chapter 9: Part 1 HPV and Cervical Cancer Pathogenesis](#) and *Part 2 Undone Science in the HPV Vaccination Programs*.

I summarised this researched information in an article titled '[The Pharma Funded Promotion of HPV Vaccines](#)'

In June 2018 my HPV vaccine research was put into a 20 min video presentation by LA Samer. The video is titled "[Gardasil/Cervarix HPV Vaccine – To Jab or Not to Jab?](#)"

Now we have the award winning documentary '**Sacrificial Virgins' touring the east coast of Australia from 2nd - 13th August**. In the interests of your child's health and as someone who has studied the medical literature on this vaccine in-depth I highly recommend that you buy a ticket and investigate this unproven and unsafe vaccine. [The dates and cities that Sacrificial Virgins will be shown can be accessed from this link.](#)

Judy Wilyman PhD  
Bachelor of Science, University of NSW

Master of Science (Population Health), Faculty of Health Sciences, University of Wollongong.  
PhD in [The Science and Politics of the Australian Government's Vaccination Program](#), UOW  
School of Humanities and Social Inquiry.*

#### **Some of the Ingredients in Vaccines:**

Did you know that antibiotics are in most vaccines? Many people are allergic to antibiotics and using any vaccine carries the serious risk of anaphylactic shock to this and many other vaccine ingredients. Are you being informed of this before you give consent to giving your newborn baby a vaccine?

Please consider whether you want these substances injected into the tissues of your new born infant before the blood brain barrier is developed at 6 months of age or their other body systems. These ingredients and more are present in vaccines and the vaccination schedule has expanded to 16 vaccines requiring 52 doses from birth to adolescence.

And the '**new norm**' - allergies, anaphylaxis, Chronic Fatigue Syndrome (CFS), autoimmune disorders (diabetes, childhood rheumatoid arthritis, arthritis, multiple sclerosis etc.) autism, speech delay, neurological disorders, ADHD, childhood cancers.

#### **Supporting Public Interest Research**

I would like to thank everyone who has supported my research and newsletters over the last 5-10 years. If you have appreciated this unfunded independent research and debate of children's health I hope you will consider a [\\$5 donation](#) for the upkeep of my website and continuation of my voluntary newsletters.

Only funded research is promoted to the public and universities do not promote student research. Hence the need for my website and newsletters to promote my independent research that is in the public interest.

My website [Vaccination Decisions](#) became necessary because the University of Wollongong [is not required to rectify the academic record to the public when organised industry-lobby groups](#) provide false information about my university research in the mainstream media.
