

Newsletter 208 Part 1: The Suppression of Scientific Debate on Vaccination in Australia

17 August 2018

The Perth billboard displaying the question "Do you know what is in a vaccine?" re-appeared in Perth this week with our WA Health Minister, Roger Cook, claiming that the board was put up by "anti-vaxxers" who are "providing lies, devious and deceitful misinformation about vaccines" to the public.

Roger Cook's comments are false and he is spreading false and misleading information about vaccines to the public - and he is basing government policies on this false information. Yesterday I did an interview with channel 9 in Perth that exposed the false and misleading information that he is providing to the public about the community's concerns about vaccines.

Perth Channel 9 decided not to provide this 20 minute interview of the community's concerns in its news bulletin on the Perth billboard last night. Fortunately I brought my own photographer to film the interview having had several years experience with Australian journalists.

Here is a link to the 20 minute interview with [Perth Channel 9 \(16 August 2018\)](#) that explains the scientific evidence that supports the community's right to choice in vaccination.

Roger Cook ignored the community's concerns in the news bulletin last night (16 August 2018) and he is still peddling false and misleading information about vaccines in the media that will harm human health. Previously he has stated that asking about the ingredients of vaccines is a "risk to public health" which is clearly false information as the opposite is true. He also emphasised that he "*would look into legislation that would ban this type of promotion*" - another measure that would harm human health.

On 24 June 2018 I [wrote to the WA health minister, Roger Cook](#), to request answers to the community's concerns about vaccination policies and to request that we meet with him to discuss our concerns. He did [not address our concerns in his response](#) and he did not organise a meeting. On 24 June I also wrote to the [health reporter at the West Australian newspaper](#) about the communities concerns about vaccines. I did not receive a response to this letter.

Australian health ministers and the Australian media are providing false and misleading information on the risks of vaccines to the public by claiming these risks are "anti-vaccination material" and preventing public debate on this topic.

This is not demonstrating that they are supporting the public's interest in government vaccination policies. It indicates that they are protecting the vested interests of the powerful **medical-industry lobby groups** that are advising them on vaccination policies - the **Australian Medical Association (AMA), the Australian Skeptics Inc / SAVN / PHAA, the Friends of Science in Medicine** - lobby group names that are deceptive to the public because they hide the vested interests that they are promoting in government vaccination policies.

Please stand up to the abuse and bullying of powerful industry-medical lobby groups and fight for our right to choice in the use of vaccines in Australia. Here is the 20 minute interview with [Perth Channel 9 \(16 August 2018\)](#) that provides the academic arguments that support the community's right to choice in this medical procedure.

Next week I will provide you with **Part 2 of The Suppression of the Vaccination Debate in Australia** which provides further evidence of how mandatory vaccination policies have been implemented in Australia - in social welfare policies and institutions (not Public Health Acts) - based on false information about the safety and efficacy of vaccines.

Judy Wilyman PhD

Bachelor of Science, University of NSW

Diploma of Education (Science), University of Wollongong

Master of Science (Population Health), Faculty of Health Sciences, University of Wollongong.

18/03/2021

PhD in [The Science and Politics of the Australian Government's Vaccination Program](#), UOW
School of Humanities and Social Inquiry.

Some of the Ingredients in Vaccines:

Did you know that antibiotics are in most vaccines? Many people are allergic to antibiotics and using any vaccine carries the serious risk of anaphylactic shock to this and many other vaccine ingredients. Are you being informed of this before you give consent to giving your newborn baby a vaccine?

Please consider whether you want these substances injected into the tissues of your new born infant before the blood brain barrier is developed at 6 months of age or their other body systems. These ingredients and more are present in vaccines and the vaccination schedule has expanded to 16 vaccines requiring 52 doses from birth to adolescence.

And the '**new norm**' - allergies, anaphylaxis, Chronic Fatigue Syndrome (CFS), autoimmune disorders (diabetes, childhood rheumatoid arthritis, arthritis, multiple sclerosis etc.), thrombocytopenia purpura (ITP), autism, speech delay, neurological disorders, encephalopathy, meningitis, ADHD, childhood cancers, and many more.

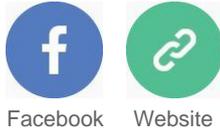

Supporting Public Interest Research

I would like to thank everyone who has supported my research and newsletters over the last 5-10 years. If you have appreciated this unfunded independent research and debate of children's health I hope you will consider a [\\$5 donation](#) for the up-keep of my website and continuation of my voluntary newsletters.

Only funded research is promoted to the public and universities do not promote student research. Hence the need for my website and newsletters to promote my independent research that is in the public interest.

My website [Vaccination Decisions](#) became necessary because the University of Wollongong [is not required to rectify the academic record to the public](#) when organised lobby group activists, such as **Australian Skeptic Inc / SAVN, Friends of Science in Medicine, the AMA** and other **activists from the powerful industry-medical complex** provide false information about my university research in the mainstream media.
