

Newsletter 222 Athlete Confined to Wheelchair after Third Gardasil (HPV) Vaccine

8 February 2019

Important articles in this Newsletter:

- 1) [Athlete Confined to Wheelchair After Her Third Gardasil \(HPV\) Vaccine takes Merck to Court](#)
- 2) [The Pharma Funded Promotion of HPV Vaccines \(2013\) \(Also published in more detail in my PhD thesis\)](#)
- 3) [Marketing the HPV Vaccines to Prevent Cervical Cancer \(2013\)](#)
- 4) [HPV Vaccines and Cancer Prevention \(Infectious Agents and Cancer Journal \(2013\)](#)
- 5) [Global Website Documenting Adverse Events to the HPV Vaccine and Court Cases in Many Countries](#)

Here is the information on the HPV ("cervical cancer" vaccine) that the Australian mainstream media is not presenting to the public and it is the reason why the Australian government is [censoring the scientific debate on vaccines](#).

The fine line between ['educating'](#) and ['marketing of drugs'](#) is clearly exposed with the HPV vaccine that was rolled out in Australia after cervical cancer in all developed countries was significantly reduced by **Pap Screening** (death rate 1.7/100,000 women in Australia in 2004) - a screening test with zero side-effects. The vaccine was not introduced until 2007 in Australia.

In contrast the HPV vaccine has many serious side-effects and does not protect against all strains of the *Human Papilloma Virus* (HPV) which are associated with causing cancer. Further, an HPV infection with any strain **does not cause cervical cancer on its own** - other factors are required in combination with the HPV virus for an infection to progress to cancer later in life - and most women in developed countries do not have these other co-factors.

Many young adults have died or had their [quality of life reduced](#) by this non-evidence based vaccine. This athlete who is now in a wheelchair is one of many cases that are before the courts in many European countries. HPV vaccine is unnecessary and it clearly does not protect community or individual health because there is a higher risk of serious damage from the vaccine than there is from getting cervical cancer in a developed country like Australia

Please take the time to read this article describing the [recent court case of a 24 year old athlete](#) who has been confined to a wheelchair since receiving her third HPV vaccine injection at 16 years of age. The new 9-strain HPV vaccine has [500 mcg of aluminium in it](#) - a neurotoxin that accumulates in the organs and is linked to causing autoimmune diseases.

So why is the Australian mainstream media and government ignoring this evidence regarding a significant health issue that is linked to a drug that is injected into healthy adolescents?

This is because the Australian Health Department and the Social Services Department are being influenced through political donations and lobbying from industry-funded lobby groups such as the Australian Medical Association (AMA)/Australian Skeptics/SAVN and Friends of Science in Medicine.

These lobby groups are providing false and misleading information to the health departments (State and Federal), assisted by **Richard Di Natale**, the leader of the Greens Party.

This [corruption of the political process](#) and government health departments has resulted in the Australian Health Department funding parents who have no health qualifications to tour the country promoting vaccines **based on their own child's experience from an infectious disease**. This is unethical because the Health Department is ignoring the deaths and illnesses caused by vaccines.

In contrast the Australian Health Department, through the HCCC and industry-lobby groups through the mainstream media, are informing the public that independent university academics such as myself are providing false information about vaccines - **not the unqualified parents that are being funded and awarded to promote vaccines to the public**.

Until this corrupt political system for making public health policy is addressed and until the precautionary principle is applied in the development of government vaccination policies then the health of the Australian community will continue to decline and the government will continue to claim that this reduction in the quality of our life is the new "normal".

Supporting Public Interest Research

I would like to thank everyone who has supported my research and newsletters over the last 5-10 years. If you have appreciated this unfunded independent research and debate of children's health I hope you will consider a [\\$5 donation](#) for the up-keep of my website and continuation of my voluntary newsletters.

Only funded research is promoted to the public and universities do not promote student research. Hence the need for my website and newsletters to promote my independent research that is in the public interest.

My website [Vaccination Decisions](#) became necessary because the University of Wollongong [is not required to rectify the academic record to the public](#) when organised lobby group activists, such as **Australian Skeptic Inc / SAVN**, and other **activists from the powerful industry-medical complex** provide false information about my university research in the mainstream media.
