

Newsletter 223 WA Premier, Mark McGowan Providing False Information to Push Mandatory Vaccination in Schools

21 February 2019

Important links in this newsletter:

- 2) [US Government pays out Millions to Flu Shot Victims who have been Killed or Paralysed etc.](#)

On the 12 February 2019 Mark McGowan, the Premier of Western Australia claimed in parliament that:

"...this year, this house will see legislation to improve the health of Western Australians. Legislation will be introduced to bring in the principle of "no jab no play" in WA. Although it is a big step to take, we must not lose perspective on this issue. The elimination of preventable diseases through immunisation and the establishment of herd immunity has not only saved the lives of an untold number of children, it has been one of the great public health successes of the past century. To let that be undone would be a tragedy."

Mr. McGowan is mistaking 'immunisation' for 'vaccination' and this makes his claim for the need for mandatory vaccination policies **false**.

Immunity to infectious diseases can *sometimes* be obtained *temporarily* (boosters required) by artificial stimulation with vaccines or it can be obtained

naturally resulting in **long-term** immunity through mild and asymptomatic (no symptoms) infections.

The latter is how **herd immunity** was established in developed countries like Australia by **1950/60** and most vaccines did not exist until very recently.

Mark McGowan's claim is false and the opposite of this statement is true. Vaccines are causing [serious illness and deaths](#) in the Australian population and mandatory vaccination will harm many people in our genetically diverse population.

Further, Mr. McGowan has passed Phase 1 regulations in the WA parliament regarding mandatory vaccination that were not presented to the WA community for consultation **prior to their implementation** on 1 January 2019.

Nor has he met with any of the concerned WA community to discuss the risks of vaccines that he will be enforcing on the general population through social welfare and educational services.

This is undemocratic and the general public is not required to give their consent to regulations if they were not consulted **prior** to their implementation. The general public has the right to *withdraw consent* in a democratic country if there was no **free, prior and informed consultation** before the regulations were accepted into government policy.

Mark McGowan has stated that he worked with the **Australian Medical Association** (AMA) to develop these regulations. This is an **industry-medical** lobby group that does not represent all doctors and health professionals in Australia. This WA government/AMA partnership has implemented Phase 1 regulations that **do not** ensure that evidence is collected that will prove that it is necessary to ban unvaccinated children from educational settings.

In fact the **Royal Australasian College of Physicians (RACP)** that represents *many more Australian doctors than the AMA*, states that this policy is unnecessary and would be detrimental to children's health and well being. However, Mr. McGowan has decided to **ignore this medical advice** without providing an opportunity for any community discussion of this critical health issue.

If Mr. McGowan had added the following action to the Phase 1 regulations then the government would be basing its vaccination policies on transparent evidence. But it has not. It is implementing a ban on unvaccinated

children without this supportive evidence.

The following addition to the Phase 1 regulations is needed to demonstrate if it is necessary to ban unvaccinated children from school settings:

*'The persons in charge of childcare centres/schools must collect the vaccination status of every child who gets a case of an infectious disease and provide this information **to parents, doctors and the chief health officer (CHO)** for each State.'*

But the government will not be collecting or publishing this evidence to support its policies. The Australian government **has never published this data** that would show if it is the vaccinated or the unvaccinated children who are getting these diseases.

The '**no jab no pay/play**' policies are based on the **assumption** that it is unvaccinated children getting these diseases. And this assumption is heavily promoted by the mainstream media and now Australian comedians are encouraged to promote this assumption and to denigrate parents wanting choice in vaccination.

Instead of evidence, the Australian government is implementing these policies by **breaching democratic principles** (no public consultation and banning of free speech and debate of vaccination) to achieve its desired goal. These actions by the government are protecting pharmaceutical interests in government policies.

If mandatory vaccination was about **public health** then the government and media would not be suppressing the academic debate of this topic.

Mark McGowan's false claim is unsupported and it ignores the significant harm that is being caused by the increased use of vaccines in the community. He is promoting a lie about the benefits of vaccines that governments have been pushing for decades. This has been achieved by [censoring the debate on vaccination](#).

Censorship enables governments to promote false and misleading information unchallenged and unaccountable.

To date this censorship has involved Australian [journalists](#) smearing my university research with false and misleading information and describing it as a 'conspiracy theory'. The Australian government has also permitted the media to

state that my university research should not be presented in council venues.

The government and the industry lobby groups such as the [Australian Skeptics Inc/SAVN](#) are also banning doctors and other academics/parents from coming to Australia and speaking about the risks of vaccines.

[Dr. Sherri Tenpenny](#) was prevented from coming to speak in Australia in 2015 by the abusive tactics employed by the **Australian Skeptics/SAVN/ Friends of Science in Medicine** - industry lobby groups who are pushing vaccines in government polices by breaching due process.

Recently David Icke was banned from coming to Australia. It will interest you to know that on the 11 February 2019 he published a **10 min video** titled - [The Vaccine Scam: the tide is turning](#) in which he talks extensively about the Australian government's mandatory vaccination policies that are causing death and disability in the Australian population.

If Mark McGowan's comments were **true** then the **University of Wollongong** would not have approved [my PhD thesis](#) that provides the evidence to prove that his claims are false and harmful to human health.

Evidence that the Government is Providing False Information about the Benefits of Vaccines:

The ex-director of the government vaccination surveillance team (NCIRS) for 20 years, **Professor Peter McIntyre** attempted to have my PhD removed after it was published in January 2016.

He led the push by the lobby group the **Friends of Science in Medicine** to present a petition to have my PhD removed. But they were not successful. Removing my PhD would have assisted in covering up the false claims that the government has been making about vaccines for 20 years and more.

Peter McIntyre was also involved in a court case in December 2018 where my expert witness report was leaked to the [Sydney Morning Herald](#) by the government's team of lawyers. My reputation and research were defamed with false information in this and other media articles **before** the case was due to be heard on 12 December 2018.

This is a **criminal offence** under Section 121 of the Family Law Act and I have reported the government's team of lawyers in this case to the **Australian Federal Police** for investigation.

The rogue doctor, **Dr. John Cunningham**, a Melbourne orthopedic surgeon and leader of the SAVN lobby group, has also been permitted to [fabricate allegations of misconduct](#) about my university research on the whooping cough vaccine and these allegations were published by the ABC media in 2014 - even though John Cunningham **did not provide any evidence** for his fabricated allegations.

This was immediately prior to the discussion and implementation of the Federal Government's 'no job no pay' social welfare policies in October 2015.

The **Australian Health Practitioner Regulation Agency (AHPRA)** would not investigate this [behaviour by a medical practitioner](#). In fact, John Cunningham, was rewarded for his conduct with an **Order of Australia Medal (OAM)** in 'Science and Immunisation' (January 2016), even though he has no specialised qualifications or publications in immunology, infectious diseases, public health or vaccination science. This award was publicised by the **Australian Skeptics Inc/SAVN lobby group**.

In contrast, when [Dr. John Piesse](#) spoke up regarding his observations of 40 years experience of the damage that the current schedule of vaccines is doing to children's health his registration was suspended and he was investigated - but his case was **prevented from being heard in court**.

This situation of doctors being threatened with de-registration if they speak about the risks of vaccines (described as 'anti-vaccination material' by AHPRA and the government) is a breach of the medical code of conduct and it is a danger to human health.

Corruption of the political process is enabling public health policy to be designed on the false information provided by powerful lobby groups in Australia.

This needs to be exposed and the Australian government and any politicians who have implemented vaccination policies that are being enforced through coercive social services and educational policies, **will be held accountable** for implementing policies that have been designed by powerful lobby groups with false and misleading information.

These policies are a crime against humanity and the concerned community of professionals/parents are being ignored in this debate.

Bachelor of Science, University of NSW

Diploma of Education (Science), University of Wollongong

Master of Science (Population Health), Faculty of Health Sciences, School of Public Health, University of Wollongong.

PhD in [The Science and Politics of the Australian Government's Vaccination Program](#), UOW School of Humanities and Social Inquiry.

Website [Vaccination Decisions](#)

Some of the Ingredients in Vaccines:

Did you know that antibiotics are in most vaccines? Many people are allergic to antibiotics and using any vaccine carries the serious risk of anaphylactic shock to this and many other vaccine ingredients. Are you being informed of this before you give consent to giving your newborn baby a vaccine?

Please consider whether you want these substances injected into the tissues of your new born infant before the blood brain barrier is developed at 6 months of age or their other body systems. These ingredients and more are present in vaccines and the vaccination schedule has expanded to 16 vaccines requiring 52 doses from birth to adolescence. Here is a link to the Australian government's list of vaccine ingredients as listed in [Appendix 3 of the Australian Immunisation Handbook 2018](#).

And the '**new norm**' - allergies, anaphylaxis, Chronic Fatigue Syndrome (CFS), autoimmune disorders (diabetes, childhood rheumatoid arthritis, arthritis, multiple sclerosis etc.), thrombocytopenia purpura (ITP), autism, speech delay, neurological disorders, encephalopathy, meningitis,

Supporting Public Interest Research

I would like to thank everyone who has supported my research and newsletters over the last 5-10 years. If you have appreciated this unfunded independent research and debate of children's health I hope you will consider a [\\$5 donation](#) for the up-keep of my website and continuation of my voluntary newsletters.

Only funded research is promoted to the public and universities do not promote student research. Hence the need for my website and newsletters to promote my independent research that is in the public interest.

My website [Vaccination Decisions](#) became necessary because the University of Wollongong [is not required to rectify the academic record to the public](#) when organised lobby group activists, such as **Australian Skeptic Inc / SAVN**, and other **activists from the powerful industry-medical complex** provide false information about my university research in the mainstream media.

ADHD, childhood cancers, and many more.
