

Judy Wilyman | Vaccination Update

## Newsletter 231 The US pays \$110 Million to Vaccine Victims and Australia Mandates 12 Vaccines for Early Childhood Education

17 May 2019

### Important Information in this Email:

- 1) US Department of Justice (DOJ) Report pays [\\$110 million for Vaccine Injuries and Deaths](#) (many for Influenza deaths and disability).
- 2) My recent interview with David Crowe (26 March 2019) in the US titled '[The Infectious Myth - Judy Wilyman on Vaccines and Censorship in Australia](#)'
- 3) Elizabeth Hart's Open Letter to Scott Morrison (7 May 2019) [Challenging Conflicts of Interest in Australia's Vaccination Policies](#)

### Deaths and Diseases/Disability Caused by Vaccines

On 8 March 2019 the Department of Justice reported that the US Vaccine Injury Compensation Program (VICP) for the **first three months of 2019** paid out **\$110 million** for [deaths and diseases/disabilities](#) caused by vaccines: many from the influenza vaccines. In total the VICP has paid out **\$4 billion** and this is known to represent only 1% of the deaths and diseases being caused by vaccines.

You will not hear about this in your corporate-sponsored mainstream media or from your doctors. In Australia the Health Ministers even inform the public through the media that "There are no risks in vaccinating your children" ([Jillian Hennessey, Vic Health Minister, 2017](#)).

This was proclaimed as the Victorian government mandated 12 vaccines for children to attend early childhood education centres. This policy removes the choice to vaccinate from all two parent working families as they cannot work without childcare for 0-4 year old children.

This lie provided by Jillian Hennessey was used by the Australian government and media to promote the influenza vaccine to children and adults and to support the Australian government in implementing a policy requiring 12+ vaccines to participate fully in Australian society - including

welfare payments, early childhood education, employment and immigration.

This has occurred whilst the Australian government continues to claim that '**vaccination in Australia is not compulsory**'.

In Newsletter 230 I informed you that Australia's corruption ranking under the Liberal government has slipped 6 places since 2013 to [13th on the Global Corruption Index](#). This corruption is with respect to accountability and transparency in organisations and government policy.

In Australia [failures in transparency face little or no punishment](#) and there is no consequence for [breaching federal lobbying rules](#). In addition, the [freedom of information rules have been undermined](#) with delays, high costs and a record rate of refusals. Refusals of requests are at the highest level since records began.

The lack of accountability in the [donations and lobbying](#) of our government has enabled **Dick Smith's Australian Skeptics/SAVN and Friends of Science in Medicine (FSM)** lobby groups to provide [false information to the Australian Health Department](#) about vaccines without accountability. This is endangering human health because it has led to the mandating of a medical intervention (vaccination) into government legislation - **No Jab No Pay/Play**.

This has also occurred because the **Medical Board of Australia (MBA)** has removed the autonomy of doctors and nurses to speak about the risks of vaccines. This is being dismissed as '[anti-vaccination material](#)' and doctors and health professionals are de-regulated in Australia if they provide this material (the risks of vaccines) to their patients.

Australian doctors are now breaching their hippocratic oath to put their patient's best interest first because they are being required to promote the government / industry's vaccination programs and not the research that they see that is not provided in their education that is sponsored by the pharmaceutical companies.

This is demonstrated in a recent article in **The Australian Guardian** titled '[Health professionals threatened with disciplinary action if they spread anti-vaxx messages](#).' This article quotes Dick Smith's **Skeptic/SAVN/FSM** lobby group activist, **Ken McLeod**, saying 'he along with the group (**Skeptic/SAVN/FSM**) have reported hundreds of chiropractors, along with several doctors and nurses, to AHPRA over the past decade.'

Ken McLeod does not have any health or science qualifications and yet he and his **Dick Smith corporate lobby group activists** have reported many health professionals and academics to the health department and regulatory board with false information. This has led to disciplinary action for doctors/health practitioners/educators [based on false information](#).

It has also led to false and misleading information about vaccines being provided to the community and the Federal Circuit Court by the Australian health department and the mainstream media.

The Guardian Australian article ([10 May 2019](#)) also quotes **Julie Leask**, a social scientist who researches vaccines with the government NCIRS. In this article she states '...a specialist saying a vaccine may cause harm with no evidence can set people on a lifelong path to being anti-vaccination.'

Why is this *government social scientist researcher* suggesting there is no evidence for harm when

the US VICP has paid out over \$4 billion to the 1% of recognised harm caused by vaccines?

**Julie Leask** was recently a co-author of an article that was published in the industry-funded journal 'Vaccine' (February 2019) that attempted to critique my PhD research on the Australian government's vaccination program. The four authors of this article include the former directors and founders of the government National Centre for Immunisation Research and Surveillance (NCIRS), **Peter McIntyre and Margaret Burgess**.

These authors from the NCIRS have a serious conflict of interest in writing a derogatory article about my university research on the government's vaccination program because my evidence contradicts their recommendations in these policies over the past 22 years. My research demonstrates that the Australian government has not funded the proper causality studies that can prove that it is safe to combine 12-16 vaccines in children's bodies.

This is the [unfunded science](#) in the Australian government's vaccination programs.

This **Vaccine** article has been published with **Kerrie Wiley** as the lead author to hide the serious conflict of interest of the former directors - **McIntyre and Burgess** - in writing this article. It is the first and only scholarly attempt at critiquing the arguments in my PhD since it was published three years ago and [it is seriously flawed](#).

Burgess and McIntyre established the NCIRS in 1998 and over the next 20 years the program was expanded with financial incentives for both doctors and the community to use vaccines and then 12+ vaccines were mandated in government social welfare policies in 2016 (**No Jab No Pay /Play** policies). This was done with the assistance of the donations and lobbying of Dick Smith's corporate lobby groups.

In 2016 there was no health act or regulation that supported compulsory vaccination in Australia but vaccines were mandated with coercive measures for *some groups* in social welfare, education and employment policies. These policies are breaching the ethical codes of medical conduct and the Nuremberg Code that was implemented to prevent government's from experimenting on the population.

The serious conflicts of interest in Australia's vaccination policies are well documented in this open letter to Scott Morrison from Elizabeth Hart on 7 May 2019 - [Challenging Conflicts of Interest in Australia's Vaccination Policies](#)

Recently there has been much debate about establishing a federal anti-corruption and integrity commission in Australia and due to pressure the Scott Morrison government finally agreed. However, the model that the Liberal government has agreed to implement has been [described as a sham](#).

On Saturday 18 May 2019 the Australian public have the chance to vote to reverse this slide of corruption and to protect human rights in government policies. The two parties with candidates in the senate that have written policies against any mandatory or coercive medical interventions in government policies are:

- 1) [The Involuntary Medication Objector's Party](#)
- 2) [The Health Australia Party](#)

These parties will represent your right to health choice in Australia.

*Judy Wilyman PhD*

*Bachelor of Science, University of NSW*

*Diploma of Education (Science), University of Wollongong*

*Master of Science (Population Health), Faculty of Health Sciences, School of Public Health, University of Wollongong.*

*PhD in [A critical analysis of the Australian government's rationale for its vaccination policy](#) (the science, politics and ethics of Australia's vaccination policies) , UOW School of Humanities and Social Inquiry.*

Website [Vaccination Decisions](#).

### **Supporting Public Interest Research**

I would like to thank everyone who has supported my research and newsletters over the last 5-10 years. If you have appreciated this unfunded independent research and debate of children's health I hope you will consider a [\\$5 donation](#) for the up-keep of my website and continuation of my voluntary newsletters.

Only funded research is promoted to the public and universities do not promote student research. Hence the need for my website and newsletters to promote my independent research that is in the public interest.

My website [Vaccination Decisions](#) became necessary because the University of Wollongong [academic re](#) organised lol as **Australian Skeptic Inc / SAVN**, and other **activists from the powerful industry-medical complex** provide false information about my university research in the mainstream media.
