10. Add your voice to a petition for [review of the Lockdown Measures adopted in Australia before the WHO risk assessment of coronavirus 2019 had been declared.](#)

16 July 2020

The Australian Mainstream Media and COVID19 Propaganda:

In Canada the concerned community has begun [legal action](#) against the lockdown measures that were introduced to control COVID19 when the risk from this new virus has turned out to be [similar or less than](#) a normal influenza virus.

Similar legal action has [begun in the UK](#) and other countries will follow suit. I explain in this Newsletter 262 why the Australian Prime Minister, Scott Morrison's claim that the lockdowns are a "good precautionary measure" are false and they will cause serious harm to the general population. I also describe why isolating healthy people is the exact opposite to the scientific knowledge that we have of how to control a new mutated coronavirus.

On 13 April 2020 I was contacted by channel 9's **A Current Affair** program and asked if I would do an interview with reporter **Lauren Golman**. This is because I published this 12 min video titled "[Media Propaganda on COVID19: the reasons why social distancing and locking down healthy populations are not good 'precautionary measures' in the current disease outbreak](#)" on 4 April 2020. It was censored by YouTube on the same day.

This video exposed the flawed scientific assumptions that were used in the mathematical modelling by the GAVI/WHO/CDC to predict a "global pandemic" in 2020.

On the 13 April my comments were supported by the US Surgeon-General, **Jerome Adams** when he **dumped** the WHO/GAVI/CDC '**Predictive Contagion Model**' because in his own words "[it was not based on real data](#)" (at 13.50 mins on this link he says "**Models are projections when you don't have data**").

More specifically, it was not based on real data from **individual countries** and this is why you cannot predict a 'global pandemic' using a mathematical formula with **generic assumptions** about pathogenicity. But Bill Gates would not know this because he has no health qualifications ([or any formal qualifications](#)) and reputations/careers are destroyed [if you speak truth to power](#).

It is **biased media information** that is being used to convince the public that vaccines have been the main factor in reducing the risk of infectious diseases. This is completely false. I declined to do this interview with channel 9 because of the false information the **Australian media** has spread about my research (and me) since 2009. This was when I first started presenting my research for debate.

Below is the letter that I sent to channel 9's **Lauren Golman** on 15 April 2020 explaining why I was not interested in going on **A Current Affair** on 15 April 2020. Channel 9 ignored the concerns I presented in this letter and the program editor used segments of my video (above - published 4 April) without my permission, to misinterpret my research and comments to the public. This was the very reason why I had declined to do an interview.

In addition, channel 9 used the rogue doctor, [John Cunningham](#), leader of the medical-industry SAVN **lobby group** and an urologist, Kate Armand, to comment on my research - even though the urologist was not presented with any of my research - she was presented with someone else's letters about vaccination - that had nothing to do with me.

This channel 9 program titled "[Anti-Vaxxer's - Times Up?](#)" (15 April 2020) framed my research to the public with false information and they did not mention that the **US had dumped the flawed contagion model on 13 April 2020**: a significant development in this pLanned (faked) pandemic that is removing human rights.

To read the complete letter that I sent to Lauren Golman on 15 April declining to be

interviewed please [click here](#). This letter was copied to a producer at Channel 10 at the same time. I will publish here an excerpt from my letter stating the points about COVID19 and vaccines that I wished to present:

15 April 2020

To Lauren Golman, Channel 9 A Current Affair – Re request for an interview:

Hi Lauren,

[Excerpt from my letter]

Hence I will provide you with information I would like to present (on COVID19 and vaccines) in this email:

1) I am requesting that if you do a story about my research that you do not present it as anti-vaccination or a conspiracy theory. Universities do not approve PhD's that do not use evidence to support the arguments therefore I am not presenting a conspiracy theory and you are defaming my research if you present it in this way.

2) My background to this research can be found on my website www.vaccinationdecisions.net

3) This issue is about 'mandatory' vaccination not pro- or anti- vaccination. Hence we are talking about whether the government has the right to decide what is injected into people's bodies and not whether you support or do not support vaccination.

4) The government and media have suppressed the risks of vaccines, their ingredients and the fact that everybody's genetics means that they will react differently to a vaccine. Serious deaths and illness will occur in many people after mandating many vaccines (now the flu) vaccine in the population. Here is a reminder of what happened in 2010 after the flu vaccine was promoted to children - [Hundreds of seizures, convulsions, and some deaths occurred after this 2009 pandemic swine-flu vaccine was given to children](#).

5) A global pandemic cannot be predicted on a mathematical model because of the different environmental conditions in every country and the different quality of healthcare systems in different countries/regions. So the prediction of a global pandemic is flawed.

6) Scott Morrison triggered the pandemic response in Australia on 21 January 2020. The WHO did not declare a '**global pandemic**' risk from this virus until 11 March 2020. What evidence did our prime minister use to bring in social distancing in Australia? This has not been provided to the public.

7) Mutated coronaviruses occur every year because they are common in all populations (7-15%) of all respiratory viruses so it is important the **Scott Morrison** provides the evidence that he used to bring in a police state that was ordered by an outside organisation ([the Bill Gate's funded GAVI alliance that includes the federation of pharmaceutical companies](#)) that did not assess the virus with respect to our own conditions and healthcare in Australia.

8) Disease criteria can be changed from year to year so knowing how these deaths are being diagnosed is critical to whether we have a serious 'new' disease or not. Until there is independent assessment of the diagnosis of deaths and transparent knowledge of any underlying health conditions that they have then we do not know that COVID-19 is any more deadly than any other mutated coronavirus that we are exposed to every year in the flu season.

9) **Peter McIntyre**, ex-director and deputy-director of the government NCIRS for 22 years (1997- December 2017) [has not provided the science](#) that has been used to support coercive vaccination in Australia. Why not? He has also not provided the science that shows that Australian children [are healthier after receiving the mandated 12-16 vaccines](#) and he can't because the government NCIRS DID NOT INVESTIGATE THIS LINK. The Australian government has been negligent in its duty of care to the people and it

is mandating multiple vaccines when children's health has declined significantly **since 1997** when the NCIRS was established to research the health effects of vaccines on the population.

10) Since I began promoting my research [Peter McIntyre](#) has been involved in inappropriately trying to have my PhD removed with a lobby-group petition, he has participated in a federal crime that was reported to the AFP by being involved in leaking my expert witness report to the media and he and his NCIRS colleagues have written a critique of my PhD thesis that attempts to discredit my thesis with false and misleading information. He has a conflict of interest in doing this because he is responsible for the science that has been used in vaccination policies for 22 years – and now to mandate them (with coercive measures in social services policy - not public health policy).

Lauren - I will be very happy to be interviewed by channel 9 when I am given a guarantee that all of my arguments will be presented without cutting and framing them to present them simply as anti-vaccination and a conspiracy theory. This is a complex and extremely important area of health and to date the mainstream media has allowed the medical-industry to present information that is removing human rights in Australia and that promotes and secures a market for more and more vaccines to be mandated in the population. This is not in the public's best interest and the mainstream media is complicit in promoting the corporate message which is harming human health.

I will publicise this email with a video of the information that I **would have provided to you**. Please contact me again when you can guarantee that I will be able to present the information that shows how our right to health freedom in Australia has been removed. It is the lack of true investigative journalism in Australia and chief-editors who will present this information truthfully to the public, that are a major reason why we are in this situation today.

Kind regards,
Judy

About Dr. Judy Wilyman PhD

I have been studying the vaccination topic both formally and informally since 1993 when I vaccinated my first child. Like most people questioning vaccines, I have not come from an anti-vaccination position and the debate is not about pro or anti-vaccination. It is about safety, efficacy and necessity for each vaccine on the schedule. Are they all safe? And are they all effective and necessary?

In 2015 I completed a PhD at the University of Wollongong answering these questions.

My thesis is titled 'A critical analysis of the Australian Government's rationale for its vaccination policy'. In Chapter 7, I present a discussion of the claims made by the government about the safety and efficacy of vaccines that are not supported by scientific evidence.

Bachelor of Science, University of NSW

Diploma of Education (Science), University of Wollongong

Master of Science (Population Health), Faculty of Health Sciences, School of Public Health, University of Wollongong.

PhD in: [A critical analysis of the Australian government's rationale for its vaccination policy](#) (the science, politics and ethics of Australia's vaccination policies), UOW School of Humanities and Social Inquiry.

Website: [Vaccination Decisions](#)

Supporting Public Interest Research

I would like to thank everyone who has supported my research and newsletters over the last 5-10 years. If you have appreciated this unfunded independent research and debate of children's health I hope you will consider a [\\$5 donation](#) for the up-keep of my website and continuation of my voluntary newsletters.

Additionally, my book - [Vaccination: Australia's Loss of Health Freedom](#) - is now available. This book describes the history of the control of infectious diseases in Australia with an added chapter on the strategies that have been used to remove health freedom in Australia.

The Australian government NCIRS (the

Only funded research is promoted to the public and universities do not promote student research. Hence the need for my website and newsletters to promote my independent research that is in the public interest.

My website [Vaccination Decisions](#) became necessary because the University of Wollongong [is not required to rectify the academic record to the public](#) when organised lobby group activists, such as Australian Skeptic Inc / SAVN, and other activists from the powerful industry-medical complex provide false information about my university research in the mainstream media.

vaccine research and surveillance unit) has attempted to denigrate my research because I have shown that children's health has significantly declined as the Australian government added vaccines to the vaccination program. Peter McIntyre and Margaret Burgess are the founding directors of the NCIRS and they did not investigate this link. Here is my rebuttal of the false information these government vaccine advisors have provided about my research in the Vaccine journal - 3 years after my PhD research was published. The two other authors of this paper (Leask and Wiley were also NCIRS researchers) - [Judy Wilyman's response to Peter McIntyre and Margaret Burgess's Vaccine article that attempts to discredit my PhD.](#)
