Newsletter 265:

Vaccines and Anaphylaxis: Government Health Directives

17 August 2020

Did you know that a side-effect of **Influenza vaccines** that is listed on the package inserts is '[severe anaphylaxis](#)'?

Vaccines are responsible for [harming \(and killing\) millions of people](#) each year *but this is not presented in the mainstream corporate-sponsored media.*

The significant increase in anaphylaxis, chronic illness and neurological damage in children for 30 years has developed in *direct correlation* to the vaccination program and it has been ignored by governments to claim 'vaccines are safe' - even though this is a [plausible biological cause](#) of the damage we are observing to children's health.

Whilst the government claims that 'correlation is not causation' the fact that they have not investigated this link with a properly designed causality study means that **pseudoscience** is being used to claim that vaccines are safe.

In 2018 the US government lost a [Landmark Vaccine Lawsuit](#) that showed that the US government had not done any proper safety studies (using true inert placebos) to test any vaccine for 32 years: the same conclusion as my own [in-depth PhD research](#) in 2015. This is basic scientific method and Australia uses the same vaccines as the US but they are approved under a different name.

Further, all doctors and pharmacists need to be trained in *anaphylaxis management* when giving vaccines ([NSW Health Directives: anaphylaxis management](#) (10 August 2020)). This is due to the well documented neurological damage caused by vaccines: a causal link that has been known since 1913 when [Charles Richet won a Nobel Prize](#) for his study of vaccines and anaphylaxis.

Whilst the government claims this is a 'rare' event (no evidence provided) this is clearly **not a rare event** because all teachers are now required to carry epi-pens for this explosion of anaphylaxis in children since 1990 - *when the vaccination program expanded*. And millions of other parents are now long-term carers for their children with encephalopathy, Kawasaki's disease (vasculitis) and other neurological damage (autism).

The suppression of the [risks of vaccines](#) is also enhanced by not reporting vaccine-related deaths: In Australia: "There is no requirement for a doctor certifying a death to make any documentation of an antecedent vaccination on a death certificate, even if the individual was of stable health prior to the vaccination, and deteriorated subsequently and terminally."

In addition, these 16 vaccines were not used to control infectious diseases by 1950 in all developed countries. Governments are re-writing history and indoctrinating the population in school curriculums with false claims about the benefits of vaccines.

Evidence that Vaccines did not Control Infectious Diseases:

1. Here is the graph demonstrating [the decline in all infectious diseases in Australia](#) (and all other developed nations) by 1950 – *before vaccines were developed* (Greg Beattie 2011).
2. Here are the comments from all the [prominent public health officials](#) of the 20th century that concluded the deaths to all infectious diseases declined **before** mass vaccination campaigns were implemented in Australia.
3. Here is a link to the [summary of my PhD](#) that demonstrates that the government's claims about the benefits of vaccines have been made by ignoring this scientific evidence and by not investigating the plausible correlation between the increase in chronic illness in children and the expanding vaccination program from 1990-2020. This is called **undone science** and this lack of scientific evidence for the benefits and risks of vaccines is a serious risk to human health. This undone science is described in my [PhD thesis](#) and my book '[Vaccination: Australia's Loss of Health Freedom](#)'.

It is clear that VAE's **are not rare** because **anaphylaxis** in children has **significantly increased** in a direct correlation to the increased use of vaccines in the government schedule.

The only surprise here is that the government claims that **vaccine reactions are rare** and it has ignored the [causal link between vaccines and this neurological damage](#) that is skyrocketing in children - along with **vasculitis** (Kawasaki's Disease), **autism** and other serious chronic illnesses/cancers. Yet these diseases have been documented as AE's to vaccines for 70 years on the [package inserts for vaccines](#).

Government **"health"** policies are only addressing disease epidemics caused by infectious agents - diseases for which a **vaccine can be developed** to produce billions of dollars in profit for vaccine companies. The public interest of 'health' is not the priority otherwise the public would not be censored from vaccination debates and dismissed as 'anti-vaxxers' for wanting to maintain our right to fully informed choice in all medications.

The 'anti-vaccination' label is a strategy that is used by the corporate media to promote industry interests (vaccines) in government policies **and not the public interest of health**.

Vaccine reactions **are not rare** and governments have known for many decades that anaphylaxis and severe neurological damage/death is caused in many people due to the effects of vaccines on *their individual genetics*.

It is a crime against humanity that the Australian government removed **religious, philosophical and conscientious objection** to vaccination in 2015 when it mandated the childhood schedule of 16 vaccines in social services policies. It also removed many of the known contraindications to vaccines (that were known for decades) that result from our *family history and individual genetics*. That is, they arbitrarily reduced the medical exemptions to vaccination.

The Australian government needs to be accountable for the **pseudoscience** that it is using to claim that combining 16 vaccines in children is 'safe and effective' when many parents have now become long-term carers for their children.

About Dr. Judy Wilyman PhD

I have been studying the vaccination topic both formally and informally since 1993 when I vaccinated my first child. Like most people questioning vaccines, I have not come from an anti-vaccination position and the debate is not about pro or anti-vaccination. It is about safety, efficacy and necessity for each vaccine on the schedule. Are they all safe? And are they all effective and necessary?

In 2015 I completed a PhD at the University of Wollongong answering these questions.

My thesis is titled 'A critical analysis of the Australian Government's rationale for its vaccination policy'. In Chapter 7, I present a discussion of the claims made by the government about the safety and efficacy of vaccines that are not supported by scientific evidence.

Bachelor of Science, University of NSW

Diploma of Education (Science), University of Wollongong

Master of Science (Population Health), Faculty of Health Sciences, School of Public Health, University of Wollongong.

PhD in: [A critical analysis of the Australian government's rationale for its vaccination policy](#) (the science, politics and ethics of Australia's vaccination policies), UOW School of Humanities and Social Inquiry.

Website: [Vaccination Decisions](#)

Supporting Public Interest Research

I would like to thank everyone who has supported my research and newsletters over the last 5-10 years. If you have appreciated this unfunded independent research and debate of children's health I hope you will consider a [\\$5 donation](#) for the up-keep of my website and continuation of my voluntary newsletters.

Only funded research is promoted to the public and universities do not promote student research. Hence the need for my website and newsletters to promote my independent research that is in the public interest.

My website [Vaccination Decisions](#) became necessary because the University of Wollongong [is not required to rectify the academic record to the public](#) when organised lobby group activists, such as **Australian Skeptic Inc / SAVN**, **Friends of Science in Medicine (FoSM)** and other activists from the powerful industry-medical complex provide false information about my university research in the mainstream media.

Additionally, my book - [Vaccination: Australia's Loss of Health Freedom](#) - is now available. This book describes the history of the control of infectious diseases in Australia with an added chapter on the strategies that have been used to remove health freedom in Australia.

The Australian government NCIRS (the vaccine research and surveillance unit) has attempted to denigrate my research because I have shown that children's health has significantly declined as the Australian government added vaccines to the vaccination program. Peter McIntyre and Margaret Burgess are the founding directors of the NCIRS and they did not investigate this link. Here is my rebuttal of the false information these government vaccine advisors have provided about my research in the Vaccine journal - 3 years after my PhD research was published. The two other authors of this paper (Leask and Wiley were also NCIRS researchers) - [Judy Wilyman's response to Peter McIntyre and Margaret Burgess's Vaccine article that attempts to discredit my PhD.](#)
